PLANT MANPOWER & OPERATION REPORT

Reporting Period: September-2026

September 2026

Particulars	Man-days	Hours
Total manpower required for deployment	78 man-days	624 hours
Total manpower provided	73 man-days	584 hours
Plant non-operation due to manpower shortage	Nil	—
Plant shutdown due to operational problems	—	72 hours

Note:

1. The handwritten record indicates nil plant non-operation due to manpower shortage in September.
2. It also records 72 hours of plant shutdown due to an operational problem.
3. One accompanying handwritten note is unclear.

Summary & Observations

- 73 man-days (584 hours) were provided against 78 man-days (624 hours) required, a shortfall of 5 man-days (40 hours).
- 72 hours of plant shutdown due to an operational problem.

Reporting Period: October 2026 (Up to 22 October)

Particulars	Man-days	Manpower hours	Operational issue downtime
Total manpower required for deployment	57	456	—
Total manpower provided	50	400	—
Plant non-operation due to manpower shortage	6	48	—
Plant disturbed due to operational issue	—	—	48 hours

Summary & Observations

- October up to 22 October: 50 man-days (400 hours) were provided against 57 man-days (456 hours) required, a shortfall of 7 man-days (56 hours).
- October separately records 48 hours of plant non-operation due to manpower shortage and 48 hours of plant disturbance due to an operational issue.

Conclusion

1. The records show manpower deployment below the stated requirement in both reporting periods.
2. The shortfall was 5 man-days in September and 7 man-days in October up to 22 October.
3. In addition, plant downtime/disturbance was recorded due to manpower shortage and operational issues.

The operational issue entries should be checked against the plant log before formal submission.
